

# RIDA ZAFAR

B.Sc. (Honours) Computer Science and Statistics, CHRIST (Deemed to be University), Bengaluru

linkedin.com/in/rida-zafar-11253b285 | github.com/helperfn | Bengaluru, Karnataka, India

## EXPERIENCE

### Sabaton Systems LLP, Bengaluru

February 2026 – May 2026

*Software Developer (Intern)*

- Built a multi-tenant regatta-management platform in Rust using Axum, SQLx and Askama: 382 commits and 135 merged pull requests across a 31,500-line codebase, including a protest, hearing and appeals system compliant with the Racing Rules of Sailing Part 5 and 70–71 lifecycle.
- Shipped a versioned Notice of Race and Sailing Instructions builder with in-process Typst PDF generation and an interactive Leaflet course designer, plus a transactional email system for registrations, invitations, OTP verification and document publication.
- Hardened the application for production with CSRF middleware, Argon2 hashing, HMAC-TOTP email verification, rate limiting and audit logging, and led a security audit that identified and fixed multiple insecure direct object reference vulnerabilities, alongside 421 tests and 65 database migrations.

### Ernst & Young (EY), Bengaluru

May 2025 – June 2025

*Technology Consulting Intern*

- Built an internal tool that converts Business Requirement Documents into structured epics and user stories, reducing manual requirements-documentation effort for consulting teams.
- Fine-tuned open-source language models and integrated OpenAI APIs for document generation, evaluating output quality against consultant-written baselines and iterating on prompts and training data.

## PROJECTS

### Service Monitoring Toolkit for Regatta Manager

2026, in progress

*Python, SQLite, Windows Task Scheduler*

- Polymorphic Probe class for HTTP and TCP checks, writing to an append-only CSV behind an atomic lock, with a per-run heartbeat that distinguishes a stalled scheduler from a healthy service.
- Restartable ingestion into SQLite using only the standard library, with byte-offset reads and deduplicated inserts, reporting availability, p50 and p95 latency and 5xx rates against a non-overlapping seven-day baseline.
- Alert state held in SQLite, with one alert on open, one on recovery and hourly reminders at most, cutting 288 messages per day to a handful, plus a daily Markdown report.

## SKILLS

**Programming Languages:** Python, Rust, C, C++, SQL, R, Bash

**Databases:** PostgreSQL, MySQL, SQLite

**Frameworks and Libraries:** Axum, SQLx, Askama, Leaflet, Typst

**Tools and Platforms:** Git, Linux, REST APIs, Microsoft Excel

**Spoken Languages:** English (fluent), Hindi (fluent), Kannada (beginner)

## EDUCATION

### CHRIST (Deemed to be University), Bengaluru

Expected 2027

*B.Sc. (Honours) Computer Science and Statistics, GPA 3.65/4.0 (9.13/10)*

### Indian Institute of Technology Madras (Online)

April 2025

*B.S. Data Science and Applications, Foundational Level*

### AECS Magnolia Maaruti Public School, Bengaluru

2024

*Grade 12, 94.8 percent*

## CERTIFICATIONS

- HR Analytics, NPTEL, 2024
- Language and Mind, NPTEL, 2024
- Basics of Python, and Python Foundation Certification, Infosys Springboard, 2023

## LEADERSHIP AND CO-CURRICULAR

- Vertical Head, BitOps, Labyrinth, the Computer Science club at CHRIST University, 2025. Led the vertical's events and operations.
- Media Volunteer, CUIE, 2025. Produced video content published on the cell's official channels.
- Accepted abstract, "Rejuvenating Lakes in Bengaluru", IEREK CST 6th Edition Conference, 2024.

## AWARDS

- Meritorious Scholarship, CHRIST University, 2025 and 2024
